Dear Distributor of Delicious Drinks,

It seems the world is ready to embrace the last (plastic) straw, and although eliminating these from our use is just the tip of the plastic ice berg, its a great place to start. It heightens our awareness to our unnecessary plastic consumption. We need reusable (not just degradable) alternatives to stop pilling up rubbish on our precious Earth.

Eco Mule is a NZ owned distributor of reuse-a-mule products and we are on a mission to make stainless steel straws as common as spoons. We have had great success introducing custom made straws in several establishments already and are now offering low prices for our next order in November 2018.

A medium sized establishment could start with 200 straws at varying sizes, especially if they prefer to supplement with disposable alternatives. Theft hasn't been an issue so far with customers loving the photo opportunity especially when straws have been detailed with their logo.

Please get in touch with us so that we can customise the straw sizes to your glassware or even work on your own uniquely engraved straws.

These prices will be valid for orders placed before the 26th of November, to arrive just in time for the silly season., 1-2 weeks is all it takes.

Description	Dimensions	Unit Price
Cocktail straw - stainless steel	6mm x 150mm	\$ 1.70

Get in touch for samples,  
 we already have some  
 stock ready to go.

We hope to hear from you  
 soon! Jack, the ASS  
 (already sustainably  
 savvy)

From Manhattan to Moscow, to Long Island or a Sling in Singapore, Eco Mule will take your customers anywhere, even to a superfood smoothie heaven, or bubble tea delight.

We have short cocktail straws and bent straws. Our standard length range from 6mm in diameter to 12mm, all 304 food grade stainless steel. We add custom detail of your logo and more!
